

## GoCode Colorado 2019 - Loom

Attention GoCode Colorado 2019 participants, you are required to include a video-powerpoint along with your semi-final submission. This is to make the powerpoints more exciting, as you will include your own voice to narrate the details of your product or analysis. The software of choice for creating these video-powerpoints is [Loom](#).

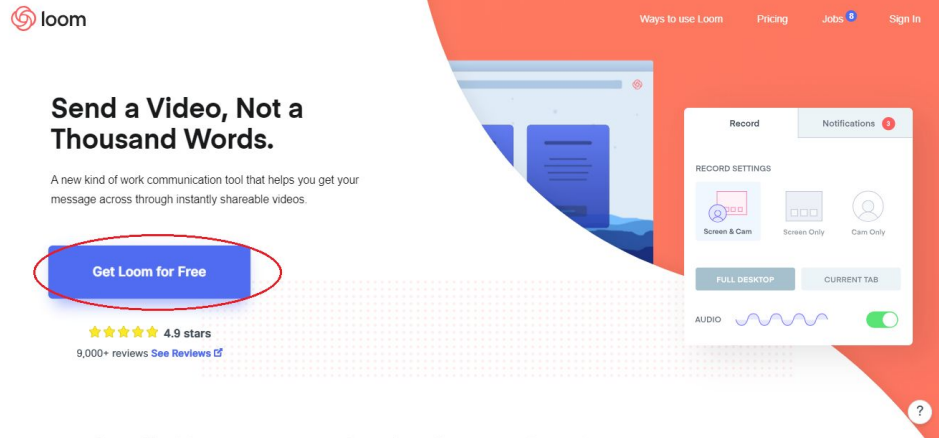

Loom is a free screen and video recording software that is very easy to use. The easiest way to get started with Loom is through Google Chrome. Loom can be added to Chrome as an extension, and can be used to record your current tab in Chrome or your entire desktop display. Below are instructions for setting up Loom.

### What your video needs:

1. Your Loom video must explain your submission using the [powerpoint template](#).
2. You can have one or multiple members of your team narrating the video, but it must be narrated.

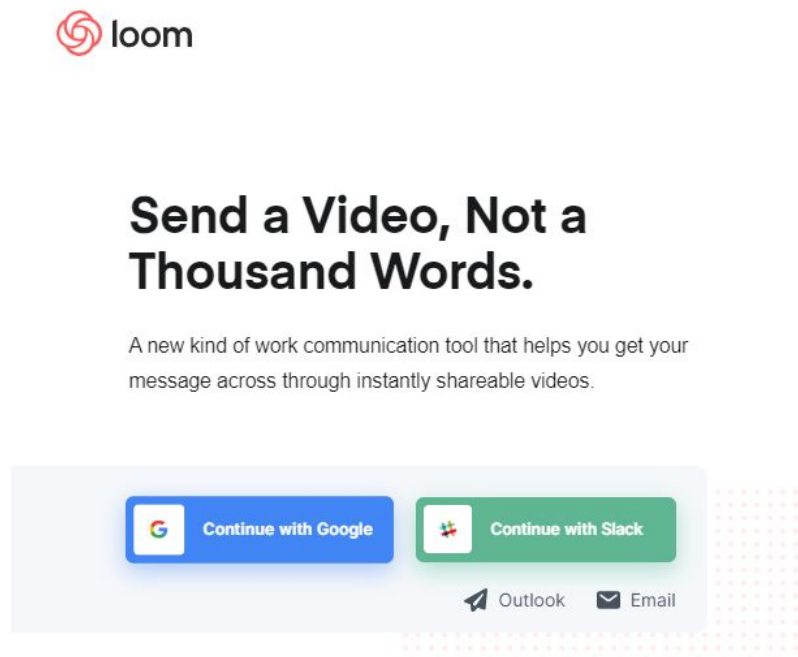

### How to use Loom:

1. Navigate to [useloom.com](https://useloom.com)
2. Click "Get Loom for Free"

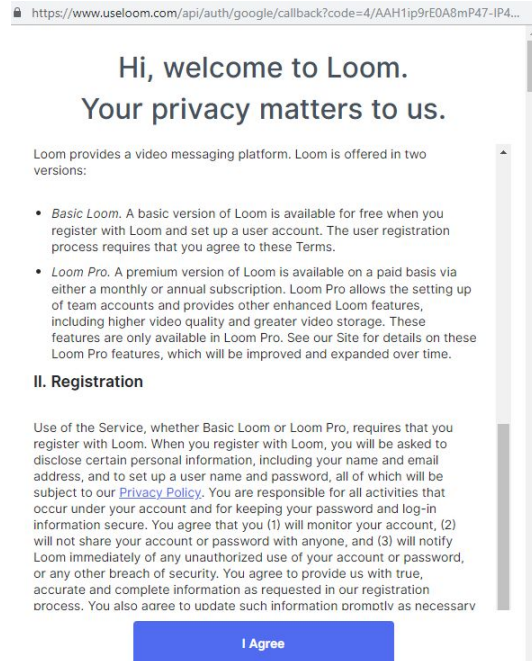

a.

3. From here, you can choose to connect Loom to your Google account or to your Slack account

a.

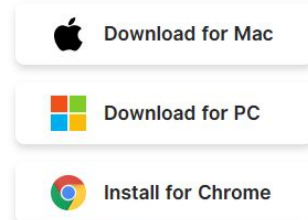

4. Agree to the Terms

a.

5. Once your account has been created, you can choose to add Loom as a chrome extension or to download the Desktop version. We recommend adding Loom to Chrome if you use Chrome for ease of use.

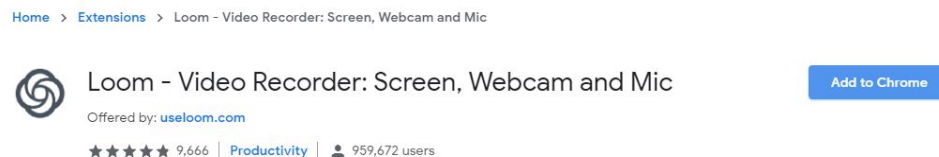

**Account created!**  
**Let's get you set up.**

Not ready to download? [Learn more about Loom](#)

a.

6. If you choose "Install for Chrome" you will be redirected to the Google Chrome Store, where you will click "Add to Chrome"

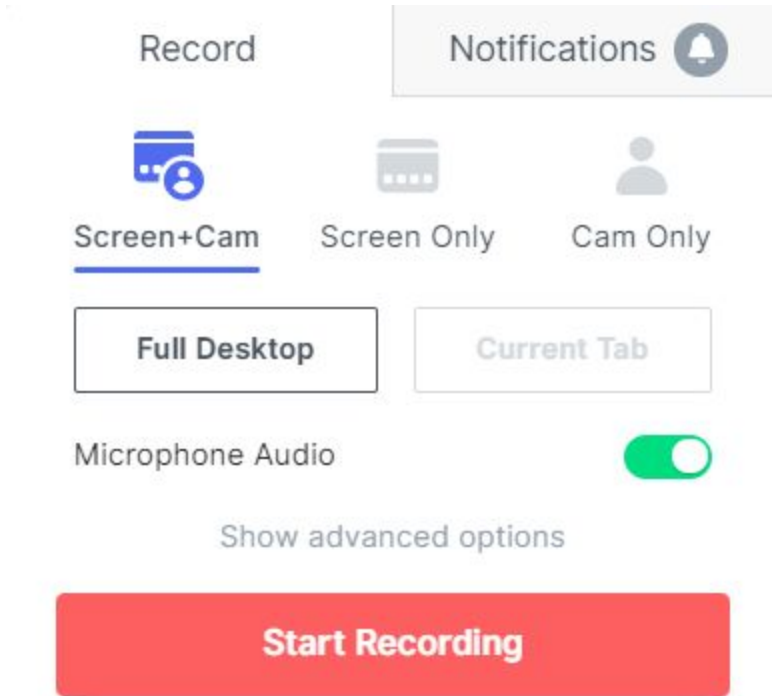

a.

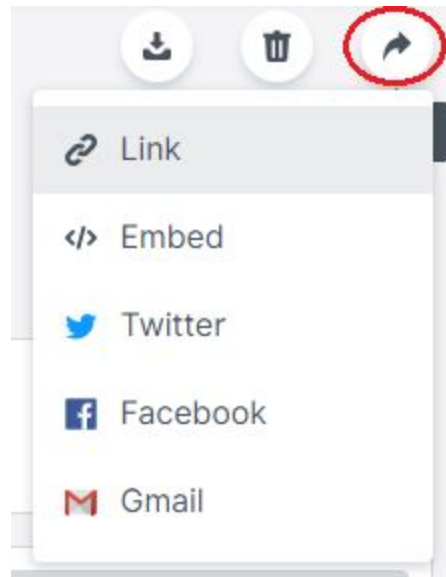

7. Now you can record your screen at any time, by clicking the Loom logo in the top right hand corner of your Chrome browser.

- a.
- b. From here you can choose what style of recording you want

- c.
8. To cancel your recording, click the red X in the lower left corner
  9. To save your recording, click the green check mark in the lower left corner
    - a. Your video will be automatically uploaded to Loom.com, where you can copy the URL to your video and include it in your GitHub README
  10. To get the link to your video, click the arrow underneath your video on Loom.com and click the "Link" option to get your shareable link. Include this link in your GitHub ReadMe.

a.

11. Paste the link to your Loom video into your team repository README on GitHub
